Forecast for Wednesday 12 Jun 2024

Weather: After a chilly start with some sunshine, probably clouding over by mid-morning albeit still with sunny intervals. Remaining largely dry for the remainder of the day with broken cloud and sunny spells, these becoming increasingly prolonged later in the afternoon and during the evening. Feeling a bit warmer compared to recent days with lighter winds.

Chance of cloud-free hill tops above 600m: >95%.

Low cloud and visibility: Cloud generally above summits. Very good visibility otherwise, with superb air clarity providing excellent views of distant peaks and landmarks.

Meteorologist's View
Despite a rather cool feel still, especially during the cloudy periods, in any sunshine UV levels will be high so it's advised to wear sun protection.

Forecast for Thursday 13 Jun 2024
Weather: Staying dry through the early hours with clear skies at first, though perhaps somewhat cloudier later. A bright start to the morning with some hazy sunshine first thing, but cloud quickly thickening through the morning and outbreaks of rain and drizzle likely arriving around noon. Increasingly wet and windy during the afternoon with the heaviest and most persistent rain and drizzle in the south. Gales are possible over the highest summits. Perhaps turning drier by midnight.

Maximum wind: Southerly 30-35 mph gusting 45-50 mph.

Chance of cloud-free hill tops 600m: 80% falling to 40%.

Low cloud and visibility: Periods of cloud developing above 600-700m by lunchtime. This becoming more extensive through the afternoon with periods of cloud above 450-500m on south facing slopes and more widely by the evening. Good visibility at first but becoming occasionally moderate through the afternoon and poor in the drizzle. Becoming generally poor or very poor on the higher slopes in the cloud with misty or foggy conditions developing.

Temperature: **Valleys:** Plus 5 Celsius rising to plus 14 Celsius.
At 600m: Plus 9 Celsius.
Freezing level: Well above the summits.
